OBJECTIVE

Aspiring Computer Science and Engineering graduate with a passion for full stack development seeking an entry-level position to leverage my expertise in front-end and back-end technologies. Eager to apply my knowledge of programming languages, frameworks, and databases. Committed to continuous learning and collaborating with a dynamic team to contribute effectively to innovative projects and drive the success of the organization.

PROJECTS

Picture-Based Personalized Skincare Recommendations

Problem: Enhance skincare choices using computer vision for precise product suggestions.

- Collect annotated facial images focusing on skin types and conditions.
- Train machine learning model to identify skin type and concerns..
- Test model accuracy using varied skin types and lighting conditions.
- Enable users to upload selfies for skin analysis and advice.
- Provide personalized skincare product recommendations based on analyzed skin data.

HTML | CSS | Python | JavaScript | ML

E- Commerce Website

The project is an E-commerce website built using the MERN (MongoDB, Express.js, React, Node.js) stack. It provides a platform for users to view and purchase various products.

MongoDB | Express JS | React JS | Node JS

ACHIEVEMENTS

- Worked as team leader and coordinator for technical events in 'Tarang-2K21' and 'Tarang-2K22'
- Participated in Hackathon

INTERESTS

- Playing Cricket
- Cooking
- Watching Movies
- Travelling
